

The **C&K** 'Reman' Advantage

The Highest Quality Alternative to OEM on the Market Today!

Non-OEM parts come to the rescue on many occasions: the OEM part is backordered; the customer needs a warranty longer than the OEM part carries; and most often, the cost differential renders the OEM part too precious for the budget. **C&K's Remanufactured Program solves all these OEM dilemmas.**

C&K has been providing Remanufactured components to large dealer groups and extended warranty companies nationwide for over 13 years.

The C&K philosophy is and has always been to provide the highest quality, closest-to-OEM part possible. Every part that C&K provides carries a complete, nationwide parts and labor warranty – shop labor rate, “book” time, and rental coverage for the customer in the event of a warranty concern. In fact, since the labor rate is payable at standard “book” time and not just “warranty” time, the C&K Reman warranty is technically BETTER than the OEM warranty. And the length of C&K warranties is completely customizable—pay only for the amount of warranty time you need.

Remanufactured Automatic Transmissions

C&K offers a complete line of both foreign and domestic automatic transmissions, all remanufactured to the latest factory specifications. All transmissions come complete with a fully remanufactured torque converter, and C&K's line of automatic transmissions are all dynamometer tested before shipping, assuring a problem free unit. In fact, C&K's failure rate of approximately 3%-5% (depending on the type of unit) is as close to OEM quality as possible. All transmissions are shipped in OEM-style plastic pods to prevent shipping damage, and most units can ship same day, assuring speedy delivery. Drawing from a production line that produces over 40,000 units per year, and including complete lines of Mercedes transmissions and ZF units for BMW and Audi, C&K is the best option when a non-OEM unit is needed.

C&K's Remanufactured line includes:

- Automatic Transmissions
- Engines
- Manual Transmissions
- Differential Assemblies
- Transfer Cases
- Cylinder Head Assemblies
- Steering Gears

Remanufactured Engines

C&K offers the most complete product line of remanufactured engines in the world. With over 20,000 listed applications for 37 worldwide auto brands, covering 95% of the market, C&K is simply the most complete source for remanufactured engines anywhere. All engines are fully remanufactured by one of the few manufacturers in the world to achieve both the ISO/TS 16949 certification level and the ISO 9001 certification. This is particularly significant as it represents both an engineering and a manufacturing certification. All domestic engines are hot-run tested, and foreign engines are SIM tested, to guarantee proper oil flow, volume, and compression. With over 15,000 engines in stock in our nine nationwide warehouses, the correct engine is almost always ready for immediate shipping to assure a delivery time within one to three days.
